Offprint Solutions: web sites for the publishing industry

Introduction

Online Magazines enables you to create and manage web sites simply and quickly.

It is functional, simple, affordable and customisable and pre packed with all the functionality to transfer a paper based magazine to the web.

This document presents some of the styles available off the shelf for Online Magazines.

Most of these can be modified to integrate with your current branding i.e. your logo can be added and/or shades / colours / fonts changed.

Alternatively a bespoke look and feel can be developed.
